

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending many years working with his brother to assemble their crane business into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

During their journey, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial marketplace for a product that could promptly and securely elevate individuals in the air to accomplish maintenance and other building functions.

After their return from holiday, John set up a joint venture with two of his friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into existing versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into many marketplaces worldwide and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer environment.
