

## Pulp Clamp

Pulp Clamps - There are numerous different lift truck accessories which can be used to make forklifts much more useful. Snowplow attachments can be mounted onto the front of a forklift. A scoop bucket can be useful if the job requires transferring soil, sand, snow, or gravel. A double block handler allows the person operating the forklift to pick up 2 loads and then pile them beside each other. Many of these accessories are extremely ideal for light to medium tasks.

One more forklift attachment is the package lift clamp, that can lift and transfer very heavy pallets. Furthermore, pallet crane forks may be used so as to lift and move pallets with an overhead crane. A drum clamp accessory is helpful for transferring really heavy drums from place to place without having to utilize a pallet. Forklift mounted hoppers enable materials to be transferred and dumped without having to do it by hand. These hoppers are self dumping when the bumper is released.

Accessible attachments now consist of accessories which allow a lift truck to carry out the task of a commercial mop or broom. Such particular accessories are most often utilized cleaning parking areas, storehouse flooring, and boat docks. Forklift mounted platforms come geared up with dual entry doors and could be connected to be able to transport workers from one site to another. The mounted platform accessory is ideal for reaching areas which can be difficult to access, particularly if you have merchandise or supplies stored in out of the way areas or way up high.

It is a versatile alternative to put in forklift attachments that could instantly transform a forklift truck into a mobile crane unit. This equipment is really useful in terms of moving loads which can be uneven or awkward. This accessory can either be telescopic, mounted on the carriage itself, or be attached or even forklift mounted.
