

Forklift Electrical Part

Forklift Electrical Parts - Lift trucks together with other lift trucks can have particular labels for use in some hazardous locations. The label indicates that this certain model of lift truck meets the minimum standards of ANSI/UL 553 used for electric lift trucks or ANSI/UL 558 meant for internal combustion engine forklifts.

Applications for labeled trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance carrier and Fire Marshall for more info about the permitted uses of industrial powered trucks in your application.

If the particular lift truck satisfies the outlined criteria, labels may be attached. A labeled lift truck will show the type of designation located on the nameplate and would have a properly corresponding label put.
