

Barrel Clamps

Barrel Clamps - A Barrel Clamp is a hydraulic or mechanical attachment meant for a lift truck. It could be utilized so as to clutch the object you wish to move using the lift truck and is typically utilized for handling kegs, paper rolls and barrels. A few designs of barrel clamp accessories likewise have a rotate function. For instance, the revolving function allows the individual operating the forklift to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
