

Meritor Part

Meritor Parts - Meritor is a leading global supplier that is proudly founded on a 100 year tradition of service and quality. They specialize in several integrated systems, modules and parts to original machinery manufacturers and the aftermarket for the industrial and transportation sectors.

Meritor values the wishes of all their customers to ensure their success while priding itself in the company's unique energy and feels this output of energy to be their competitive advantage in their international operations. Meritor begins with a philosophy which values diversity of people and their broad thought processes. Operating in 19 countries and hiring more than eleven thousand two hundred individuals, Meritor promotes collaboration and innovation among a team of experienced professionals.

Meritor strongly believes in just employing future focused employees. These top-caliber people can rapidly get used to to changing surroundings and freely demonstrate the level of commitment and performance required in order to obtain results for the competitive market environment. The business empowers their teams to make sound business decisions in order to enhance the overall success of the company. In return, Meritor offers their workers various chances for professional and personal growth.

Their Advanced Engineering team is at the forefront of components and system engineering that include drivelines, axles, suspension and braking systems meant for heavy duty and medium trucks, buses, military vehicles, trailers and off-highway vehicles. The Meritor Advanced Engineering team is growing. They launched a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the entire Asia Pacific region. This particular team is even responsible for supporting the needs of all their international engineering employees.

The Quality team at Meritor is a customer-focused and dynamic group that is committed to ensuring optimum progress at their production plants and aftermarket distribution facilities that are situated on 5 continents and in 19 nations.

The supplier development network is particularly situated so as to support new business growth. Regional teams are supported by worldwide centralized specialties, initiatives and quality systems in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making in each and every aspect of the trade. The DFSS or Design for Six Sigma ensures product reliability within every region. The team is even included transactional Green Belts who use Six Sigma tools to business processes and apply lean methods.
